# Hizero UltimateClean™ Cleaning Technology

Hizero UltimateClean™ technology taps into nature, incorporating bionic based science to deliver an innovative way to clean your homes floor.

Emulating the way animals lick up liquids and solids, our lightweight, contemporary floor cleaners are energy efficient and whisper quiet.

An all-in-one, cordless hard floor cleaning solution that sweeps and mops utilizing a unique polymer roller. The Polymer roller is not only hard wearing but it is gentle on your floor. And of course, it is self cleaning as it gently cleans your floor.

## No Suction Technology

Our unique Polymer roller technology means that unlike traditional suction cleaners, there is zero dust and other debris blown back into the air. So, the perfect solution for those family's who are allergic to dust.

## Quiet

Our No Suction Technology, also allows us to have a low noise level of only 60dB. This allows you to clean your hard floor without disturbing others in the home.

\* Sound pressure tested from 1m distance in the Hizero Lab

## Real-Time Self-Cleaning Avoiding Secondary Pollution

HiZero UltimateClean™ Bionic Cleaning Technology enables real-time self-cleaning via its innovative triple-cycle cleaning system.

### Brush Roller

Collects hard to pick up human or pet hair.

### Solid Waste Container

Separates all solids, anything from spilt spaghetti to rice. Keeping the solids away from the self-cleaning polymer roller.

### Self Cleaning

The Polymer roller is constantly showered by clean water during every rotation. This means we are only ever cleaning your precious floor with a clean polymer roller. No re-transmission of picked up dirt from the roller to your floor. So, in one simple forward motion the floor is clean.

## Debris - Liquids - Hair Auto Separation

Solids, liquids, and hair are sorted and collected into separate compartments. No clogging, no leakage, no bacteria breeding in the mixture of solid waste and the dirty water.

# Floor Cleaning-Made Easy

Class leading 60-minute non-stop cordless operation no matter what speed you choose. Allowing you to clean floors for longer without re-charging.

A flexible design allows you to clean under those hard to get to areas like a chair. We can get as low as a 20° angle.

Easy to maneuver with our Flexi head which can move left or right and of course forward. With our lightweight of only 4.1kg and motorized operation, using the Hizeo is as simple as turning it on.

## Easy to Maintain

### Solid Waste Container

Separates all the solids from the liquids, simply brush to clean it.

### Dirty Water Tank

Dirty water is separated from solids, making it easy to dispose of the dirty water down a sink.

### Hair Cleaning Tool

Clean the brush roller simply with the supplied cleaning tool in one motion.

### Snap Fit Dual Rollers

One hand operation.  
Hussle free installation.

### One Button One Easy Motion

One touch for sweeping and mopping in one easy movement. Leaves floors hygienically clean and streak free.

### Multi-Surface Usage

Designed for all sealed hard floors that are water resistant such as natural timber, ceramic tiles, marble tiles, polished concrete and laminates.

## How does our innovation work?

### How does a Hizero pick up liquids and solids?

- Cleans your floor**  
Polymer Cleaning Roller rotates to pick up all the mess from your floor. No matter if it is tomato sauce or wine, or even that hard to clean dust.
- Removes hair**  
The Brush Roller is specially designed to pick up hair from your floor.
- Removes solids**  
The Brush Roller separates all solid waste into our waste tray. Which is then easily removable.
- Removes liquids**  
Water Sink squeezes out liquid waste and automatically transfers it to the dirty water tank, free from solid matter.

### How does Hizero Polymer Cleaning Roller Work?

- Picks up**  
Cleaning Roller rolls automatically over the floor, picking up all dirt and dust.
- Separates**  
Cleaning Roller picks up the waste, the brush then squeezes all the waste from it. And then automatically separates solids and liquids.
- Flushes**  
Polymer Cleaning Roller is constantly kept clean, by being flushed with clean water.
- Self-cleans**  
As Cleaning Roller rotates, it is absorbent with clean water and ready for the next cleaning cycle.

### How do Hizero Water Tanks Work?

- Clean water supply**  
Clean Water Tank supplies clean water to flush the Cleaning Roller.
- Dirty water collection**  
Dirty Water Tank collects all dirty water squeezed out from the Cleaning Roller.
- Always Clean**  
The two separate water tubes for clean and dirty water enable Hizero to always use clean water to clean your floor.

## Key Features:

### No Suction Technology

Unlike a traditional vacuum, Hizero adopts the polymer cleaning roller to pick up all the waste and dust. Which means we also do not emit any dust or require a Hepa filter.

### Multifunctional Cleaner

Hizero is designed for all types of sealed hard floors. It can sweep and mop simultaneously, leaving your floor hygienically clean and almost dry in one easy motion.

### Automatic Waste Separation

As our Polymer roller picks up all sorts of dirt from your floor be it liquids or solids. We also separate them into different compartments, making maintenance a simple process.

### Real Time Self Cleaning

Hizero constantly uses clean water when cleaning your floor. Making sure every inch of your floors is perfectly clean.

### Quiet Like a Conversation at 60dB

By the introduction of No Suction Technology, we can reduce our noise levels down to the level of a normal conversation. So, you can go about your cleaning as others are watching TV or reading a book.

### Cordless 60 Minutes Non-Stop Runtime

Hizero will operate up to to 60 minutes on both cleaning modes allowing you to clean more floor and charge less. By minimizing energy consumption of our motors, we achieve a longer run time.

### Easy to Maneuver

The cleaning head swivels left and right and rotates around 70°, while 20° angle allows you to get into those hard to places. Like under your favorite chair.

### Energy Saving and Earth Friendly

Hizero saves water, electricity, and your time. You can clean 50 square meters floor area in only 10 minutes by consuming 500ml of water and 0.01kwh electricity.

# Specifications

## Product Name

F500 Bionic Hard Floor Cleaner

## Product Type

Cordless Upright

## Noise

<60dB\*

## Net Weight
